## Professional Profile

Fullstack Web Developer specialized in JavaScript technologies (React, Node.js, Express) with a background in design and programming. After managing operations in a family-owned industrial fishing business, I transitioned fully into digital development. I focus on building modern, scalable, and responsive web applications using technologies like MongoDB, TailwindCSS, and Next.js. I have experience in freelance, academic, and personal projects. Detail-oriented, team player, and constantly learning. Passionate about clean code, accessibility, and user experience.

## Skills

**Frontend:** JavaScript, React.js, Vue.js, HTML, CSS, TailwindCSS

**Backend:** Node.js, Express.js, PHP, Laravel

**Databases:** PostgreSQL, MongoDB, MySQL

**Tools:** Supabase, Vercel, GitHub, Firebase, Thunder Client

**Other:** Responsive Design, REST APIs, CRUD, Basic UI/UX, Internationalization (i18n), Dark Mode, Agile Methodologies

## Experience

### Freelance Web Developer

*Self-Employed – Buenos Aires | 2024 – Present*

- Build responsive websites for small businesses using React, TailwindCSS, and modern JavaScript.
- Implement contact forms, SEO basics, and deploy using Vercel or Netlify.
- Ensure accessibility, mobile optimization, and performance best practices.
- Communicate directly with clients to plan, develop, and deliver tailored solutions.

## **Operations/Logistics Manager - Family-Owned Industrial Fishing Business**

*Family business – Chubut | 2018 – 2024*

- Coordinated vessel logistics and managed port operations under high-demand conditions.
- Supervised workers and collaborated with leadership on key administrative tasks.
- Developed strong organizational, leadership, and decision-making skills in a dynamic environment.

## **Featured Projects**

### **CryptoHub (2025) - Personal Crypto Market Tracker & Analytics Tool**

Web application designed to track and analyze the cryptocurrency market in real time. Built as a personal tool. It enables users to view live prices simulate a portfolio, log trades and analyze market trends. Integrates public crypto APIs and stores user-specific data securely. Developed with Vue.js and Supabase.

### **Subilo (2025) - Private Audio Sharing SaaS Platform**

Personal project in development focused on sharing high-quality audio tracks privately. Designed as a SaaS platform, it emphasizes SEO, user experience, and idea validation. Built with React, Supabase, and Tailwind CSS.

### **Freelance Landing Pages**

Designed and delivered responsive landing pages for small businesses. Focused on fast implementation. Mobile-first design, and essential SEO setup. Ensured clear, consistent communication with clients throughout the process.

## **Education**

### **Advanced Technician in Web Design and Programming**

Escuela Da Vinci | 2021 – 2024

Comprehensive training in frontend/backend development, UX/UI design, web architecture, and agile methodologies.

### **High School Diploma in Science and Humanities**

Escuela María Claudia Falcone | 2012 – 2017

## **Idiomas**

- Spanish: Native
- English: Intermediate (fluent technical reading, basic conversation – CEFR B1)
